

Department of Natural, Information and Mathematical Sciences Mission Statement

The mission of the Department of Natural, Information and Mathematical Sciences is to prepare students academically for entry into graduate programs and professional schools. Additionally, the department's mission is to provide a biology, chemistry, or mathematics baccalaureate education to enable students to be certified to teach these subjects at the secondary school level. Further, it is the unit's mission to prepare students for entry level employment opportunities in Mathematics, Information Systems, and the Biological and Physical sciences, and to provide science, mathematics and information systems courses to fulfill the core and programmatic requirements of all other academic units on campus, including Purdue University programs.
