

This report summarizes the data submitted to IPEDS with the Graduation Rates Survey. The cohort is defined as full-time beginner (FTB), degree-seeking students who matriculated in either of the preceding summer sessions or in the fall of 1999, or students who began their coursework in high school and enrolled as traditional college students in the fall. A total of twenty-eight students are excluded from the original cohort for reasons of death (22) and military service (6).

The first table below shows the overall graduation rates for the 1998 and 1999 cohorts. These rates combine all degree-seeking students and provide the number of students who earned their degree within 150% of program length. The second table provides a view of graduation rates limited to students seeking and receiving bachelor's degrees. Because of guidelines provided by various higher education groups, these are the figures that are published externally. Finally, the last table on this page explores the composition of the 1999 beginner cohort. These figures illustrate the diversity of students served by the IU campuses, and by extension, the representativeness of the graduation rates measure as it only involves full-time students.

The campus specific pages provide similar breakdowns of the FTB students by the type of degree intended and earned, the composition of the cohort, and the overall graduation rate by a variety of incoming and demographic characteristics. New to this report is the inclusion of a five year average to place the current percentages in context. Highlighted cells exceed the five year average.

We would be pleased to hear your comments about this report or answer any questions you may have.

FW - IU students only

*full-time, first-time, degree-seeking undergraduates; **within 150% of program length

The first table below depicts graduation rates by degrees received at the "home" campus and degrees received elsewhere within IU. The second table provides overall graduation rates by various demographic and incoming characteristics. The "% pt. diff." calculates the change from the 1998 to the 1999 cohort figures. The last column provides a five year (cohort) average.

Graduation Rates by Home and Other IU Campus
