

Minutes 12/00

- 1) Report from NSM went through; none of the other degrees did
- 2) Bulletin: Sherri Rankin, AAA committee, has discussed Institutional objectives--we will meet jointly to finalize them--Peggy put "requests to deviate" in the first par.
- 3) We discussed the Chancellor's Informatics program
- 4) Bringing Barton-Kreise's poli-sci class up from the Master List--would not require a prerequisite for awhile--he just wants to get the class up and running
- 5) Clarification of Matt's phys. educ. classes:
 - E 219--for overweight--more theoretical
 - E 119--basic understanding of phys. ed.Matt may need to find another course #
- 6) Do we need a workshop to teach using Master List? AAC 1st & then part of acad. handbook?--We need consistency in numbering courses, ex IUPUI has freshman seminar but a different # than here--we may need to oversee
- 7) Fall 2001--all 100-200 courses need to be consistent and transferable by then across curriculums
 - what are we supposed to do towards this? (discipline meetings in March)
 - IUB wants to get curriculums on-line
- 8) Computer Literacy assessment committee: "Recommendations for Developing Information Literacy at IUE," March 2000
 - G100 series--basic computer skills--obsolete in many ways
 - A110 includes higher issues: computer purchasing, etc.
 - Need 3 cr. hrs. of computer skills to graduateOur comments:
 - We need a computer placement test to test out--someone who could watch over shoulder
 - Primary skill includes "create presentations"--seem to mean print, because Ppt. is not discussed
 - Using WWW should include evaluating it

I think these are all the issues we discussed. Next meeting: Thurs. Jan. 18, 9:30 am

Sincerely submitted,

Alisa
