

# **Professional Communication**

## **Mission Statement**

The mission of the Professional Communication degree is to provide students with a rich background in the Arts and Sciences that equips them with problem solving skills, communication and writing abilities, and the experience communicating and designing texts with information technologies. Such preparation allows students to seek employment as technical communicators in a variety of settings, such as business and manufacturing, the computer industry, science fields, advertising, and as freelance writers or consultants. The mission of this degree is completely consistent with the missions of both the English and Communication Arts degrees and the institution.
