### **3. GEOGRAPHY ADDITION TO SCIENCE APPROVAL PLAN**

As of July 1, 1997, our Science Approval distributor has been covering titles for the Geography Library according to a new subprofile which is attached to the Science Approval Plan. Geography was able to locate funding to contribute to the Science Approval Plan to support these new acquisitions. The Approvals staff has been coordinating with Lou Malcomb, the new Geography Bibliographer, on the implementation of this coverage.

Apart from special profiling needed to accommodate the particular needs of the subject, Geography has become a full member of the Science Approval Plan participating libraries.

Please feel free to visit the Geography SubProfile page on the Web:
