	The structure of the above class is flipped relative to that of a traditional class. There will be one interactive online class meeting per week. Before each class, students will view recorded lecture videos, complete lecture quizzes, read the textbook and work on textbook-related online activities. Weekly class time is used for collaborative, active, and inquiry-based activities designed to deepen understanding of course topics and to provide practice in disciplinary thinking (e.g., visualizing biological processes, making predictions, drawing conclusions from data, and reading and analyzing scientific publications).

	This course is designed to be blended/flipped format relative to a traditional class. Students are expected to invest time outside of class meeting to complete all of the recorded lecture videos, lecture quizzes and assignments BEFORE class. During the weekly meeting students will practice application of content through challenging problems. In-class work will be collaborative and inquiry based, involving interpretation of experimental data to deepen understanding of material. In addition, there is a strong emphasis on learning how to learn Above class meets online in-person during meeting time indicated above. Additional class activities delivered asynchronously online COLL (CASE) N&M Breadth of Inquiry credit Discussion (DIS)

		L312: P - BIOL-L 211 or BIOL-S 211 This course is designed to be blended/flipped format relative to a traditional class. Students are expected to invest time outside of class to complete all of the recorded lecture videos, textbook and other assigned readings lecture quizzes and weekly assignments. Class time is used in a variety of ways including "bench to bedside" lectures, practice in inquiry based activities, but are NOT substitutes for out of class reading. There is an increased emphasis on learning how to read scientific literature, communicate science for a general audience through creative assignment, technical writing and designing and interpreting experiments Above class taught in a Hybrid manner which includes In Person and Online Instruction. For more information visit https://covid.iu.edu/learning-modes/index.html

 Online section of Dutch: please realize that learning a
 language online is not for everybody. You have to do (under
 supervision of the instructor of course) a lot of work by
 yourself. You will get three or four times a week several
 online assignments, you have to upload in Canvas. Plus you
 will meet in Zoom once a week with your fellow students for
 75 minutes to do a lot of speaking assignments. Meeting
 time: Tuesdays from 3-4.15 pm.
 Above class meets 100% Online with a combination of
 Synchronous and Asynchronous instruction. For more

#BlackLivesMatter and how we talk about this issue matters, too. Abusive language in social media is a serious issue, and because so many posts are made every day, we cannot remove abusive posts by hand their removal must be automated. How does automatic detection work? We will discuss what abusive language is and consider how it differs based on the group it addresses (e.g. sexism, racism). Then we'll learn about automatic approaches to language analysis (i.e. what is behind Siri or Alexa), and how they are used for finding abusive language automatically. We will learn just a bit of programming. By the end of the course, you will develop, experiment with, and assess your own method for automatic detection of abusive posts. Basic familiarity with computers is assumed, but no experience with programming, machine learning, or computational linguistics is required.
