Following our evenly-divided vote at our last Academic Senate meeting, the decision is this: master keys will continue to be issued on a selective basis. Anyone who finds that he must carry more than three keys in order to get access to areas within his normal operating range should make application to Dean Risler for a master key. As a concomitant of this, we will make every effort to see that classrooms are kept open from early morning until late evening so that no one should experience the inconvenience of being locked out of a classroom.
