Therefore, class time is used for collaborative, active, and inquiry-based activities meant to deepen your understanding of course topics and to provide practice in disciplinary thinking (e.g., visualizing biological processes, making predictions, drawing conclusions from data, and reading and analyzing scientific publications). Because students learn and retain information best when they are actively engaged during class, the structure of this course is flipped relative to that of a traditional classroom. There will be one, highly interactive, required class meeting per week. Before each class, you will view recorded lectures, read, and do textbook-related online activities. Your studies will be guided by a weekly question bank, and you will have opportunities to review assigned questions and other material with other students and with instructors before each week's two-hour, in-class session. Our weekly two-hour sessions will include whole-class discussions and smaller learning group activities. Three times during the semester, the in-class session will be used for exams.

Fine Arts Studio: Students requiring an authorization should first speak to the instructor of the course. Students should note that some classes require a portfolio review in order to receive authorizations. Authorized students must still take action and register for a course. Students registered for the following courses who do not attend the first class or contact the instructor may lose their place in the course. If the class is full, students should add themselves to the electronic Waitlist and either attend the first class or contact the instructor. Electronically Waitlisted students who follow these procedures will be given priority for admittance into the course. It is the student's responsibility to monitor waitlists and adjust his/her schedule. Students added to the course via the electronic Waitlist who have not attempted to contact the instructor may be asked to reschedule

Above class is strongly recommended for any mathematics or science education doctoral student with a teaching assistantship associated with the undergraduate elementary courses E 328, E 343, and/or M 201. Also, any doctoral student interested in preparing teachers to teach mathematics and/or science are welcome This class will begin one week prior to the official start of classes for Fall 2014. Therefore, the first class will be held Tuesday, August 19, 2014									

In addition to attending this class once a week, participants will also be expected to observe eight weeks of the associated undergraduate elementary methods courses (6 weeks of E 343 and E 328; 2 weeks of the M 201 field experience). There are four-five sections of each class available to choose from each week. These hours will count towards Q612 class contact time so the final meeting day for this class will be Oct 28th, 2014 with the final project due before Thanksgiving Break

For science education doctoral students this course can count towards one of the two methods courses required for your program of studies
