

Issues from the 2005 IULFC Promotion and Tenure Committee Deliberations

- The Committee would like the following proposal to be reviewed by the Faculty Standards Committee:
 - In order to be tenured at a rank higher than assistant librarian, the record of a candidate's professional career at Indiana University ought to be such that he/she would meet the criteria for promotion to that rank. Meeting the existing criteria for tenure (excelling in performance and a satisfactory record in professional development and service) should only be acceptable in cases where the librarian is an assistant librarian and is being tenured at the rank. Someone who is already an associate librarian should be denied tenure if he/she fails to meet the criteria for promotion to associate librarian, and someone who is already a full librarian should be denied tenure if he/she fails to meet the criteria for promotion to full librarian.

- The reimbursement of expenses for regional and IUPUI campus members of the Committee needs to be clarified. Although the IULFC affirmed at their February, 2005 meeting that per diem should be paid to these members, it was again an issue this year.
