The structure of the above class is blended/flipped relative that of a traditional class. Students are expected to invest time during the week watching lecture videos [~ 2-3 hours], completing the assigned readings, starting to learn new vocabulary and complete pre-class assignments [~ 2 -3 hours] before coming to class. Submissions that will be required at regular intervals during the week (example Monday lecture assignment, Wednesday Lecture assignment) before class meets on Friday. Seek out assistance immediately when you need it during the week. Friday classes are active learning classes where students will engage in collaborative, active, and inquiry-based activities. These are designed to deepen understanding of course topics, practice disciplinary thinking and apply the material of the week to real world scenarios (drug design, scientific methods, and experimental strategies). Students are expected to come to class prepared and ready to engage with their teams We will assume that you have read the material before class

All exams and quizzes will be administered during the discussion section. Students must register for one of the 2 discussion options

 CHEM-C 117, CHEM-S 117, or CHEM-J 117

Credit given for only one of the following: BIOL-L 211 or S 211

The structure of the above class is blended/flipped relative that of a traditional class. Students are expected to invest time during the week watching lecture videos [~ 2-3 hours], completing the assigned readings, starting to learn new vocabulary and complete pre-class assignments [~ 2 -3 hours] before coming to class. Submissions that will be required at regular intervals during the week (example Monday lecture assignment, Wednesday Lecture assignment) before class meets on Friday. Seek out assistance immediately when you need it during the week. Friday classes are active learning classes where students will engage in collaborative, active, and inquiry-based activities. These are designed to deepen understanding of course topics, practice disciplinary thinking and apply the material of the week to real world scenarios (drug design, scientific methods, and experimental strategies). Students are expected to come to class prepared and ready to engage with their teams We will assume that you have read the material before class

All exams and quizzes will be administered during the discussion section. Students must register for one of the 2 discussion options

CHEM-C 117 PRINC OF CHEM & BIOCHEM I (3 CR)

This is an invitation only, small (50 students maximum) section of C117 that is intended for students who plan to continue to organic chemistry or other later courses in chemistry and would benefit from a smaller, more structured section. The course will use a specifications-based grading scheme in which students will get credit for showing mastery of core and advanced topics, and the final grade will be determined by the number of topics students master. Students will be asked to commit to being a part of a supportive and respectful learning community, to attending at least one office hour per week at any point that they are struggling, and to submitting work that accurately reflects their understanding of the material.

For more information visit https://covid.iu.edu/learning-modes/index.html TOPIC: Recent Developments in Feature Geometry A close examination of palatalization and other phonological processes in which consonants and vowels interact, as well as vowel harmonies and other long-distance processes will give us an opportunity to explore somewhat neglected area of phonological research, the theory of phonological representations. We will review recent approaches to the topic of the nature of phonological features and evaluate different theories about their interaction within the framework of Feature Geometry. From the perspective of Feature Geometry, we will take under scrutiny the role of the tongue root in phonological processes, feature [Advanced Tongue Root] ([ATR]) and the different hypotheses about the location of [ATR] in Feature Geometry, as well as, more broadly, the structure of the Place node.

VT: BRAND MANAGEMENT PRACTICUM									
CLSD	12359	PERM	04:45 P-06:00 P	MW	BH 142	King K	0	0	0
			This practicum is geared toward students interested in a career in brand management or as a creative service provider for brands. The course offers students the opportunity to work on a real brand (preferably national) with teammates who offer a variety of expertise including strategy, design, and media. Students from Kelley School of Business, The Media School, and the Eskenazi School of Art, Architecture + Design are encouraged to enroll. This team composition mimics what students will experience in their future jobs and hence, prepares them to see a business problem from a different lens and appreciate the diversity of views. This course provides students a unique learning experience of applying the synergy of different talents, knowledge, skills, and perspectives to create effective strategies, tactics, and deliverables for a brand that can be implemented in the real world. Application is required for enrollment: https://forms.gle/RQAuJheAotJ429B89 Above class meets In Person. For more information visit https://covid.iu.edu/learning-modes/index.html

VT: PREPARING FOR LIFE AS A TEACHE

CLSD	11131	ARR	ARR	WB WEB	Allen C	25	0	0
------	-------	-----	-----	--------	---------	----	---	---

In this course, students will begin to explore the personal, institutional, political, and cultural forces that impact the lived experience of being a professional teacher
 Possible key questions for reflection include: How does self-knowledge help teachers positively shape their professional lives? How does school culture shape the day-to-day life of teachers and how do you identify a school culture that is right for you? How does the current emphasis on standardized testing impact the life of a teacher and how can teachers positively respond to this? What does it mean to be a "role model" and what are the challenges and opportunities presented by this social role? What does community mean and how are teachers participants in and facilitators of positive community?
 Exploration of these questions will occur through student centered, hands-on, and interactive classroom activities

	TOPIC: Preparing for Awards, Summer Research and Internships Description: Students in this course will learn about and prepare materials for nationally-competitive opportunities for summer 2022 (e.g. summer research programs and institutes, internships). Students will learn how to find opportunities; the basic tenets of research; the importance of good writing and editing; and how work is changing. By the end of the course, students will have prepared materials (including a statement) for the opportunities they have identified. The course will also include a historical survey and analysis of the awards and the respective funding agencies. Above class meets January 3 - January 7 Above class meets 100% Online through Synchronous instruction. For more information visit https://covid.iu.edu/learning-modes/index.html
